A veteran of 10 years in the Armed Forces, I was told to put 100% effort into the things you're doing at the moment and although I'm not perfect, I walk into any situation with those words in mind. Then as I proceed, I constantly remind myself because I seek nothing more than to earn the respect of my superiors and peers.

Technical Skills:

Web Development: React.js, React Native, REST APIs

Full-Stack Development: MEAN Stack (MongoDB, Express.js, Angular, Node.js), MERN Stack (MongoDB, Express.js, React.js, Node.js)

Programming Languages: JavaScript, C#, Python, Java

Databases: SQL, MongoDB

Additional Expertise: Administrative Management, Data Collection Processes, UX Wireframes

Cloud Services: Google Cloud, AWS, Airtable, Heroku

Experience:

Freelance Fullstack Developer

Chepe Demo & Trash Haul Local Business Website

Quote Dictionary - Client Management Web Application, 2023

- Identified ways to enhance Chepe Demo & Trash Hauling's online presence.
- Engineered a dynamic web application using Node.js and React, seamlessly storing client form data in a database table.
- Designed an intuitive user interface with Material UI and CSS, contributing to increased customer engagement.
- Facilitated efficient data flow, ensuring customer information seamlessly integrated with the Quote Dictionary client management system.
- Achieved a responsive and visually appealing design, showcasing creativity and attention to user experience.
- Resulted in improved business visibility and streamlined operations for Chepe Demo & Trash Hauling.
- Developed and implemented a responsive web application using Node.js and React.
- Recognized the opportunity to enhance Chepe Demo & Trash Hauling's online presence.
- Seamlessly integrated a customer information form, enhancing communication and potential lead generation.
- Improved business visibility and facilitated customer inquiries through effective web development.

Ads Quality Admin

Adecco at Google, Los Angeles, California, 2021 - 2022

- Collaborated with software engineers to enhance advertising and targeting quality through data analysis, driving improvements.
- Generated detailed reports for issue identification, ensuring data accuracy and reliability.
- Suggested and implemented an automated language locale validation system using Google Apps Script, not only enhancing efficiency and data accuracy but also accelerating productivity by leveraging other validation processes.

Front-End Developer Intern

Code The Dream, Durham, North Carolina, 2019 - 2021

- Designed wireframes and landing pages to enhance the user interface.
- Developed an internal web application for streamlined personnel and project management, utilizing React.js in tandem with Airtable. Optimized operations within the personnel and project management realms by leveraging Airtable's robust features, enhancing data organization and accessibility.
- Gained an organization as a client for our mobile app, which they now use for their daily operational needs.
